Info:

After more than one year Slash co-owner **AHMET SISMAN** is back with his brand new solo EP! The **PLAYING WITH ACID EP** is an unapologetic combination of raw-deep techno and electro-pop influenced house music. And as we know it already from Mr. SISMAN, he loves to combine different genres and create his own distinctive flavor!

The **A-Side PLAYING WITH ACID** is a pure synthie-baseline dominated track whose melody is drilling through your head that you won't forget it so easily. This trapping hook line is coming along with some poppy vocals which are giving you a slight association how is it feeling being totally vaporized in the mind. We say, be careful when you playing with ACID!!!

FEEL TODAY THINK TOMORROW has a different approach while the ingredients remain the same. It's the more melancholic side of this record but also filled with pure energy. The guitar phrases creating those feelings between the struggle and harmony in life, and like the title indicates: live today, pay tomorrow!

NO RETURN NO REGRET is the more poppy side of this record. The **B2-Side** is a mixture of modern elements bonded with the refreshing vibe of the contemporary 80s influence. This fusion is a naive approach of pooling different styles in one track with the intention to create something timeless. Even its poppy elements doesn't seem to allow it we going to love it for a long time and we hope you will feel the same!

This three-tracker EP contains the well known "Mr. Sisman-Ingredients". Although the difference to his previous productions laying in its details. Find it out for yourself and above all: Enjoy it!!!
